

# WEATHERPROOF RESETTABLE CALL POINT

## WRP-11

The WRP-11 is a unique manual call point that mimics the feel of breaking glass whilst offering the user all the benefits and advantages of a re-settable operating element.

The WRP-11 uses a simple yet ingenious patented mechanism which comprises a rigid plastic operating element and an over-centre spring mechanism.

An activation indicator drops into view at the top of the window once the call point has been operated. The unit is then simply reset with a key and is ready for re-use straight away.

1. Positive action - mimics the feel of breaking glass
2. A warning indicator drops into view when the call point is activated
3. Resetting is as easy as inserting a key in the bottom of the call point. A quick turn of the key and the call point is reset and ready for use again.

## FEATURES

IP67 protected

EN54-11 approved

Two independent single pole  
changeover contacts -  
3A 12-24Vdc and 125-250Vac rated

Also available in Blue, Yellow, Green  
and White for non-fire applications

119mm x 128mm x 62mm size

## APPLICATIONS

The WRP-11 call point is compatible with most conventional fire alarm systems, and is safe for use in areas where glass cannot be used, e.g. food processing plants and swimming/leisure centres. As the unit can be simply reset it provides an ideal solution for areas that suffer high numbers of false activations such as schools, shopping malls and other public places.
