not just products... solutions!

Shelly

Make your home and facility smart

Shelly is a line of home automation devices that allows customers to control their home directly through a mobile phone or with a preferred home assistant. Shelly's devices are retrofit, which makes them suitable for every electrical installation with no need of additional changes or improvements.

With Shelly you can:

- Control the lights by adjusting brightness, colours, and set custom schedules.
- Control the home appliances or office equipment from anywhere.
- Save energy and money with precise power metering.
- Set custom automation features.
- Monitor temperature, humidity, and brightness.
- Receive immediate notifications in case of any status changes.
